ISOTONIX OPC-3®

VG | GF | NG

Unleash the power of Pycnogenol®†.

- Promotes cardiovascular and joint health
- Helps maintain healthy cholesterol and blood glucose levels
- Promotes sinus comfort
- Supports normal blood vessel dilation*

Pycnogenol is a natural plant extract from the bark of the maritime pine tree, which grows exclusively along the coast of southwest France in Les Landes de Gascogne. This unspoiled and natural forest environment is the unique source of Pycnogenol. Pycnogenol extract has three basic functions: It is a powerful antioxidant, selectively binds to collagen and elastin, and promotes the production of endothelial nitric oxide, which supports normal vasodilation of blood vessels.*

More than 600 scientific articles and clinical trials have confirmed Pycnogenol's safety, including the absence of toxicity and clinical efficacy over the past 35 years, making it one of the most researched ingredients in the natural product marketplace.

★ As featured in Elle Taiwan

Oligomeric proanthocyanidins (OPCs) are among today's most powerful and promising free-radical fighters. They are actually a family of antioxidants that are more powerful than vitamins C and E, long held as gold-standard antioxidants. OPCs have been shown in scientific studies to promote cardiovascular health.*

Horphag Research was founded in Berlin in 1925 and can be considered a pioneer of the dietary supplement and health food industry. Today, Pycnogenol is exclusively supplied worldwide by Horphag. Over the last 35 years, the company has invested millions of dollars in extensive scientific research assuring the safety and efficacy of Pycnogenol as an ingredient.
